INNOVATIVE FIRE SOLUTIONS

With increased global demand for bigger fire pumps and systems to support industrial firefighting and water supply units, US Fire Pump has developed a new generation of fire pumps and firefighting systems that bring big water flow to departments worldwide.

24 HOUR EMERGENCY RESPONSE

**225.209.6551
USFIREPUMP.COM**

US Fire Pump is a collective of over 200 years of experience in design, manufacturing, marketing, and purchasing. The company's founder, Chris Ferrara, has been involved in the firefighting industry for more than 40 years. Chris started his career as a Fireman where he later used his skills learned and his innovative ideas to found Ferrara Fire Apparatus. Under Chris' leadership over 6000 fire apparatus were built for customers across the Globe.

US Fire Pump began with the idea to create a large volume fire pump which was lacking in the industry at the time. Chris Ferrara and a team of engineers began the development of our flagship product, the High Velocity Pump. This pump is the largest compliant, single impeller fire pump in the world. In addition, a complete line of submersible pumps for municipal or industrial applications were developed and made available. US Fire Pump also supplies a full complement of supplemental fire equipment needed for municipal and industrial fire professionals to effectively do the job.

With US Fire Pump's world class product offering, Chris was able to use the company's platform to return to his first passion, firefighting. US Fire Pump has the largest Emergency Response team and equipment fleet globally. Understanding that no two incidents are alike, and that they can happen simultaneously, US Fire Pump has made a conscience investment in emergency response assets. US Fire Pump has been contracted and responded successfully to landfill fires, ship fires, rescue events, vapor suppression events, refinery and terminal fires as well as a wide array of other major emergency events.

**US FIRE PUMP'S PRODUCTS, SERVICES
AND EMPLOYEES HAVE ALL BEEN**

"PROVEN IN THE HEAT OF BATTLE".

SAFETY PLEDGE

US Fire Pump is committed to a strong safety program that protects its staff, its property, and the public from accidents. This is the company's most important business. No employee will be required to do a job that they consider unsafe. We will comply with all applicable OSHA workplace safety and health requirements and maintain occupational safety and health standards that equal or exceed the best practices in the industry.

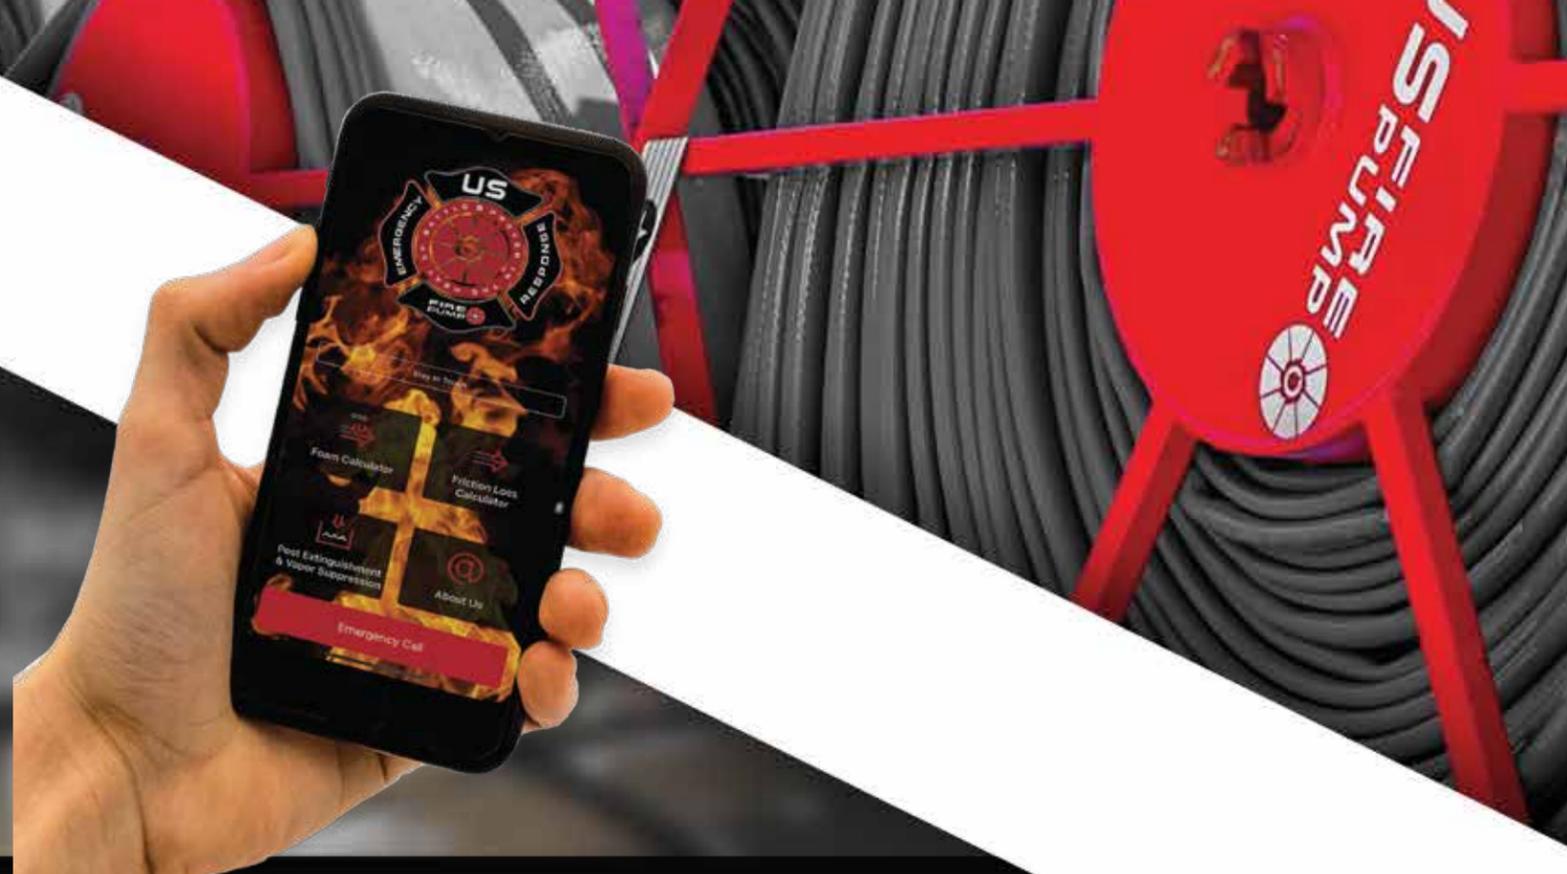

Employees at every level, including management, are responsible and accountable for the company's overall safety initiatives. Complete and active participation by everyone, every day, in every job is necessary for the safety among all workers to ensure success.

Management supports participation in the program by all employees and provides proper equipment, training, and procedures. Employees are responsible for following all procedures, working safely, and wherever possible, improving safety measures. An injury and accident-free workplace is our goal.

SERVICES

Manufacturing

US Fire Pump is recognized as the leading innovator and manufacturer of fire equipment Globally.

Emergency Response

Global Leader in Emergency Response with the largest fleet of emergency standby equipment. Can deploy over 10 miles of large diameter industrial hose for challenging water solutions and maintains strategic foam storage in 6 locations across the Globe.

APP Innovation

Providing an instant solution for calculation of foam application, friction loss in hose up to 12" and post extinguishment and vapor suppression application rates. Available on Apple App Store or Google Playstore.

Engineering Consultation

With in-house engineering US Fire Pump can tackle projects ranging from design of temporary fire water systems, site hazard assessments, complex hydraulic studies, and custom-built equipment.

Training

As technology continues to evolve, new techniques and systems must be deployed to provide a safer tactical approach to fire hazard mitigation. US Fire Pump's IFSAC/PROBOARD certified instructors develop custom programs to meet the exact needs of Fire Departments.

CUSTOM ENGINEERED SOLUTIONS

US Fire Pump employs an in-house engineering team for custom design solutions for your next project.

BUSINESS DEVELOPMENT

Offering innovative and life-saving solutions to complex problems faced by Fire Industry personnel through engineering design, manufacturing, and emergency response assistance.

EXPERIENCE MATTERS

US Fire Pump's 24/7 emergency response team consist of over 60 experienced Industrial Firefighting Specialists who have all been through the "HEAT OF BATTLE".

IN THE EVENT

Of an emergency we can mobilize and flow more than 100,000 gallons per minute with our world class standby equipment.

TECHNICAL DESIGN

"Smart" technology solutions and design allow systems to operate autonomously and on-demand.

MARKETING

A trusted and recognized market leader with over 200 years of experienced technical sales and marketing professionals who have a proven track record of innovative marketing and sales expertise.

A GREAT BUSINESS COMES FROM A GREAT IDEA.

Listening to new ideas is what makes a great business. Looking at only traditional firefighting methods and equipment makes a company just another company doing the same thing as everyone else. US Fire Pump is committed to listening to the people in the field, who do the job every day. Learning from front line personnel about the daily challenges of adapting and overcoming obstacles, breeds innovation. The US Fire Pump team welcomes the challenge of creating new lifesaving solutions for industry personnel who put their lives on the line daily to protect people and assets.

COMPANY MISSION

Protecting the lives of the public and fire industry personnel while limiting property damage.

PROJECT MANAGEMENT

Experienced Project Management teams implement and adhere to project plans to ensure that the project life cycle and milestones are achieved.

RISK MANAGEMENT

Design Engineers and Project Managers assist with risk management studies, processes and installation protocols and guidelines to reduce internal implementation risk.

INDIVIDUAL APPROACH TO EVERY CLIENT

Not every client is the same and understanding this is paramount to offering solutions to each individual client. US Fire Pump's design engineers and technical sales teams offer custom solutions and assistance for your specific needs.
